PROFESSIONAL SUMMARY

Backend & AI Engineer with 1.5+ years of experience building scalable backend systems, workflow automation platforms, REST APIs, and AI-powered applications. Experienced in Node.js, TypeScript, LangChain, RAG pipelines, vector databases, and LLM integrations. Passionate about developing production-ready AI solutions that automate business workflows and improve operational efficiency.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Backend: Node.js, Express.js, REST APIs, Microservices, JWT, OAuth 2.0, RBAC, Webhooks

Frontend: React.js, Next.js

AI / GenAI: LangChain, OpenAI API, RAG, Prompt Engineering, Agentic Workflows, HuggingFace, LLM Integration

Databases: MySQL, PostgreSQL, MongoDB, Redis, Qdrant, Pinecone, Chroma, FAISS

Tools & Platforms: Git, Docker, Postman, Razorpay, Stripe, WhatsApp Business API, Google APIs

PROFESSIONAL EXPERIENCE

Backend Developer

Jul 2024 – Present

Infoware

Remote, India

- Designed and developed WhatsApp CRM backend with automated workflows and intelligent triggers, reducing manual operations by 70%.
- Built a no-code workflow automation engine enabling businesses to create custom automation sequences without technical expertise.
- Developed AI-powered RAG chatbot using LangChain and Qdrant, improving customer support efficiency and reducing support workload.
- Implemented secure Healthcare Management System APIs with JWT authentication and role-based access control (RBAC).
- Built scalable backend APIs for Online Marketplace Platform supporting vendor management, products, orders, and payment integrations.
- Developed Learning Management System APIs for course management, assessments, and learner progress tracking.
- Optimized API performance through query tuning, indexing, and Redis caching, reducing response times by 40%.
- Improved database scalability and application performance through schema optimization and efficient resource utilization.

TECHNICAL PROJECTS

AI Interview Hiring Copilot — GitHub — Live Demo | *Node.js, React.js, Gemini API, Socket.io, PostgreSQL, LangChain*

- Built a full-stack AI hiring platform that conducts candidate interviews, evaluates responses, and generates structured hiring reports.
- Implemented resume analysis, candidate evaluation, and structured interview report generation using LLMs.
- Designed contextual interview flows with dynamic question generation and conversation memory.
- Developed secure backend architecture with authentication, role management, and interview analytics capabilities.

SupportPilot AI — GitHub — Live Demo | *Node.js, React.js, TypeScript, Gemini API, LangChain, Express.js*

- Built a full-stack AI customer support platform that answers user queries using RAG-based knowledge retrieval and Gemini-powered response generation.
- Built document ingestion and retrieval pipeline for accurate customer support assistance using LLMs.
- Built multi-source knowledge ingestion pipeline supporting documents and web-based content.

EDUCATION

University of Delhi

Delhi, India

Bachelor's Degree

2021 – 2024

Presidency College

Bengaluru, India

Pre-University Course (PUC)

2019 – 2021
